BUSINESS OVERVIEW

1 HomiQ

HomiQ (formerly Adiputra) is a property management company founded in December 2021 in Yogyakarta. We maximize unused properties by turning them into profitable guesthouses, villas, homestays, and other living spaces.

2 Property Portfolio

- Adiputra Guesthouse Tata Bumi (29 Rooms)
- Villa Albinna (3 Rooms)
- Home Sweet Home (4 Rooms)
- House of Elea (2 Rooms)

3 Other Business Units

- Homiq Working Space
- Homiq Bed
- Homiq Laundry

Hospitality Excellence

BUSINESS CONTEXT & CHALLENGES

HomiQ manages multiple hospitality properties through a combination of Online Travel Agencies (OTAs) and direct booking channels. Although the business continues to grow, property performance varies significantly in terms of revenue, occupancy, and profitability. Seasonal demand, OTA dependency, and differences in operational efficiency create challenges in identifying the most effective growth strategy. This analysis evaluates property performance, booking trends, distribution channels, and customer segments to uncover actionable recommendations that improve both revenue and profitability.

Seasonal demand causes fluctuating occupancy.

Heavy reliance on OTA platforms increases commission expenses

Profitability varies significantly across properties.

Difficulty identifying the most profitable properties, channels, and customer segments.

STRATEGIC QUESTIONS

Q1: Which properties drive the highest profitability, and which ones are underperforming relative to their capacity and cost structure?

Stakeholders:

Board, CEO, Finance

Q2: How does demand vary across weekdays, weekends, and seasons, and how can HomiQ optimize occupancy?

Stakeholders:

Marketing, sales, CEO

Q3: Which booking channels drive the most value, and are we overly dependent on platforms that impact margins and long-term growth?

Stakeholders:

Marketing, finance, CEO

Q4: Where should HomiQ focus its efforts to drive growth—through optimizing existing properties, improving operations, or targeting high-potential customer segments?

Stakeholders:

Marketing, Board, CEO

DATASET OVERVIEW

→ Data Sources

Internal booking transaction data (2025)

Property operational cost records

Property master data (room & capacity)

External tourism statistics (BPS Indonesia)

→ Analysis Scope

Period: January – December 2025

4 Properties with 38 Rooms

1,181 Booking Transactions

KEY FINDINGS & ACTIONABLE RECOMMENDATIONS

Finding 1: Adiputra Guesthouse Tata Bumi Dominates Revenue but Indicates Portfolio Imbalance

Insight:

- Adiputra Guesthouse (29 rooms) contributes the majority of revenue and occupancy, but its profit margin (69.5%) is lower than Villa Albinna (82.6%) and House of Elea (80.2%).
- Smaller properties (villas & houses) remain underutilized due to their whole-property rental model, unlike Adiputra Guesthouse which benefits from flexible room-by-room bookings.

Optimize pricing & positioning for smaller properties (bundling, niche targeting) to improve utilization and reduce dependency on a single asset.

Finding 2: Strong Weekend & Seasonal Demand, but Weak Weekday (Monday - Thursday) Occupancy

Insight:

- Occupancy tends to be higher during weekends and peak seasons.
- Weekday demand remains relatively weak, particularly on Tuesdays and Thursdays, which together account for only 27% of total bookings.
- Home Sweet Home stands out among all properties, with 65% of its bookings occurring on weekdays—the highest proportion compared to the other properties, which average around 55%.

Launch weekday-focused promotions (discounts, long-stay deals, corporate packages) to smooth demand and increase overall occupancy.

KEY FINDINGS & ACTIONABLE RECOMMENDATIONS

Finding 3: High Dependency on OTA Channels Reduces Margin Control

Insight:

- OTA channels contributed 70.3% of HomiQ's total revenue, indicating strong dependence on third-party distribution platforms.
- Agoda charges the highest commission rate (25%) while also accounting for the largest share of bookings (14%), creating the greatest pressure on overall profit margin.
- Direct booking contributes only a small share of total revenue.

Increase direct bookings through Homiq website optimization, WhatsApp conversion, and guest loyalty programs to improve profit margins and strengthen direct customer relationships

Finding 4: Untapped Growth Potential in Customer Segments & Property Optimization

Insight:

- No clearly defined customer segmentation strategy (e.g., family, group, corporate, and long-stay markets).
- Based on the Property Performance analysis, Home Sweet Home records the lowest revenue and one of the lowest profit margins, indicating that its current distribution channels and market positioning have not been fully optimized.
- Strong growth opportunities remain through targeted optimization

Prioritize high-potential customer segments, reposition underperforming properties based on demand patterns, and transform customer review insights into operational improvements that drive higher customer retention.

KEY ACTIONABLE RECOMMENDATIONS

1. Optimize Smaller Properties to Reduce Revenue Concentration

While Adiputra Guesthouse contributes over 66% of total revenue, smaller properties remain underutilized despite delivering margins above 80%.

Increase occupancy of smaller properties by 15-20% through targeted promotions, long-stay packages for house-type properties, and differentiated positioning.

2. Maximize Weekday Revenue

Drive weekday demand by introducing weekday long-stay offers, work-from-anywhere packages, dynamic pricing, and corporate partnerships to improve occupancy.

Target: Increase Monday-Thursday bookings by 15% within the next 6-12 months.

3. Increase Direct Booking & Reduce OTA Dependency

Build a direct booking funnel (website + WhatsApp + repeat guest incentives) to shift demand away from OTA platforms and improve margin efficiency.

Flow convert OTA guests into customer retention:

OTA → Guest Stay → WhatsApp → Voucher → Next Booking Direct

4. Focus on High-Potential Customer Segments

Create identify customer and prioritize high-value customer segments from existing booking data by tailoring property positioning, pricing, and marketing strategies.

- **Guesthouse → Flexible room-based bookings for individuals, corporate guests, and travel groups.**
- **Villas/Houses → Entire-property rentals targeting families and group travelers.**

APPENDIX

Adiputra Guesthouse contributes approximately 67% of the company's total revenue, equivalent to around IDR 1.15 billion

APPENDIX

Adiputra GH generates the highest revenue at approximately IDR 1.15B, but its margin (69%) is lower than smaller properties like Villa Albinna (82%), indicating that higher scale does not necessarily translate into higher efficiency.

APPENDIX

Adiputra Guesthouse is HomiQ's only room-based property, making it comparable to BPS occupancy data for non-star hotels in the Special Region of Yogyakarta (DIY). This benchmark provides additional context for evaluating its occupancy performance.

APPENDIX

July generated the highest revenue (~IDR 317M) from only ~128 bookings, indicating stronger pricing power and higher-value demand during the peak season.

APPENDIX

OTA channels contribute approximately 59.7% of HomiQ's total revenue. However, commission rates vary significantly across platforms, with Agoda charging the highest commission at 25%.

APPENDIX

Agoda contributes the highest OTA revenue (IDR 310.6M) but also incurs the largest commission fee IDR 77.6M), suggesting a trade-off between revenue growth and profitability.

Next Steps & Contact

What Would I Do in the Next 90 Days?

Month 1 → Drive Demand & Position Properties

Month 2 → Increase Direct Bookings & Build Partnerships

Month 3 → Understand Customers & Improve Experience

Let's Build Data-Driven Growth Together!

Every dataset tells a story. My role as a Data Analyst is to uncover that story, transform it into business insights, and recommend actions that create measurable impact. Thank you for your time. I look forward to connecting with you.
